

area

area

2 rows of 5 = 10 square units
or
 $2 \times 5 = 10$ square units

equilateral triangle

equilateral triangle

area

2 rows of 5 = 10 square units
or
 $2 \times 5 = 10$ square units

The measure, in square units, of the interior region of a 2-dimensional figure or the surface of a 3-dimensional figure.

equilateral triangle

A triangle whose sides are all the same length.

isosceles triangle

isosceles triangle

isosceles triangle

A triangle that has at least two congruent sides.

base of a polygon

base of a polygon

compose

2 triangles can form a rectangle.

compose

base of a polygon

The side of a polygon that is perpendicular to the altitude or height.

compose

2 triangles can form a rectangle.

To put together, as in numbers or shapes.

decompose

decompose

decompose

To separate into components or basic elements.

formula

formula

Volume of a cube is $V = 6s^2$

formula

Volume of a cube is $V = 6s^2$

A general mathematical statement or rule.

three-dimensional

three-dimensional

three-dimensional

3-D. Existing in 3 dimensions; having length, width, and height.

whole numbers

whole numbers

0, 1, 2, 3...

whole numbers

0, 1, 2, 3...

Any of the numbers 0, 1, 2, 3, 4, 5, and so on.

polygon

polygon

polygon

A closed figure formed from line segments that meet only at their endpoints.

prism

prism

prism

A 3-dimensional figure that has two congruent and parallel faces that are polygons. The remaining faces are parallelograms.

quadrilateral

rectangle

quadrilateral

rectangle

quadrilateral

A four-sided polygon.

rectangle

A quadrilateral with two pairs of congruent, parallel sides and four right angles.

right rectangular prism

right triangle

right rectangular prism

right triangle

right rectangular prism

A prism with six rectangular faces where the lateral edge is perpendicular to the plane of the base.

right triangle

A triangle that has one 90° angle.

scalene triangle

surface area

scalene triangle

surface area

Surface Area = 40 square centimeters

scalene triangle

A triangle that has no congruent sides.

surface area

Surface Area = 40 square centimeters

The total area of the faces (including the bases) and curved surfaces of a solid figure.

triangular prism

vertex

triangular prism

vertex

triangular prism

A prism with three rectangular faces and two triangular bases where the lateral edge is perpendicular to the plane of the base.

vertex

The point at which two line segments, lines, or rays meet to form an angle. (plural – vertices)

volume

square-based pyramid

volume

Volume =
27 cubic units

square-based pyramid

volume

Volume =
27 cubic units

The number of cubic units it takes to fill a figure.

square-based pyramid

A polyhedron whose base is a square and whose other faces are triangles that share a common vertex.

triangular prism

triangular pyramid

triangular prism

triangular pyramid

triangular prism

A prism with three rectangular faces and two triangular bases where the lateral edge is perpendicular to the plane of the base.

triangular pyramid

A pyramid with a triangular base.

unit cube

fractional edge length

unit cube

fractional edge length

unit cube

A precisely fixed quantity used to measure volume.

fractional edge length

The length of each edge of the cube is a fraction.

parallelogram

kite

parallelogram

kite

parallelogram

A quadrilateral with both pairs of opposite sides parallel.

kite

A quadrilateral with two distinct pairs of equal adjacent sides. A kite-shaped figure.

polyhedron

rhombus

polyhedron

rhombus

polyhedron

A 3-dimensional figure that has polygons as faces.

rhombus

A quadrilateral with all four side equal in length.

trapezoid

trapezoid

trapezoid

A quadrilateral which has one pair of parallel sides.

edge

edge

edge

The intersection of a pair of faces in a three-dimensional figure.

lateral faces

lateral faces

lateral faces

In a prism, a face that is *not* a base of the figure.
